

38SI™

HEAVY DUTY BRUSHLESS ALTERNATOR

HIGH EFFICIENCY = FUEL ECONOMY

Go to delcoremy.com to calculate your savings when you install a 38SI.

FEATURES & BENEFITS

- **Brushless Advantage:** fewer moving parts means less wear and longer life
- **Equipped with Remote Sense** which can reduce battery charge time by 50%

Remote Sense utilizes a second wire that reads the actual voltage at the battery. This signals the alternator to boost its output to compensate for the voltage drop, ensuring 14 Volts at the battery. The proper voltage forces more current into the battery bringing it to a full state of charge between vehicle stops.

- **OE approved,** assuring OE quality and performance for aftermarket replacements
- **Superior output** producing up to 215 Amps at road speed and 121 Amps at idle
- **Warranty:** 3 year/unlimited miles (Applicable to U.S. and Canada only)

High efficiency translates to less engine horsepower requirements, resulting in substantial fuel savings.

Real time operating data was collected on several vehicle applications for the overall vehicle and electrical system. The following chart shows the fuel cost savings over a typical life cycle by increasing the alternator efficiency from 60% to 72%.
